Faces of an inner world

- A new, astrology-based method for personality and fate analysing -

*Did you know that there is a warrior inside of you who fights for what you want?
Did you know that there is a ruler inside of you who leads you on your winding path?
Did you know that there is a mediator inside of you influencing your thinking?
Did you know that there is a sorcerer inside of you who drives you towards extremes?
Did you know that your inhibitions and failures are largely due to the rigid and
conservative old man living inside of you?
Many other figures are living inside of you as well. They are your role personalities.*

This book introduces the figures living in your soul – as they appear in your astrological birth chart. Our method gives a refreshingly new insight into astrological symbols and helps you visualize your inner dramas through intriguing portrayals and subject pictures.

Everybody has an inner Realm („the inner world“), controlled from a Royal Court. This Court is called KaSztella® - a Castle of Stars. The characters living in our Realm and Castle, largely determine our personality and course of fate.

Assemble the parts of your unique inner world and get closer to the figures who shape your personality and destiny!

About the method

Our book introduces our unique inner characters. With the help of the book we can meet the figures who inhabit our inner world, build up our personality, and thus shape our destiny as well. These characters play various roles in our inner world, and they also determine the role we play in the outer world. Everyone has an almost completely unique cast. These figures have harmonious or tense relationships with each other, hence they perform a kind of “royal drama” on the stage of our inner world – a drama that has a meaning and an end to it.

We all have a King living inside of us, a ruler who represents our rational self, a decision-maker who is responsible for the way we act (he is the Sun in astrology). In order to govern our life adequately, he needs the help of other figures in his Court. From among these other characters his female counterpart, the Queen (Moon) stands out as significant; she is the symbol of our emotional world. The Courier (Mercury) is the official mediator of the Court, who shows the way we think, move and express ourselves. Our inner harmony and sophistication is mirrored in the Lady-in-Waiting (Venus), whose task is to wage peace – in contrast with the Captain (Mars), the leader of the army, who has to fight and obtain what we want. These five figures are only the main characters, besides them many other figures and factors build up our personality and destiny. One of the most important factors is our Realm, our unique inner world (the ascendant in astrology).

Many of us know that if they were born on May 1st, they belong to the Taurus sign. But everyone must know that this usually applies only to the position of the Sun, that is, these people have a Taurus King. Yet, now we know that besides the King there are other important characters living inside of us, who also play a role in shaping our personality. Their positions and signs can be determined by astrological programs, tables and charts. On our website – www.kasztella.com – everyone can obtain a personal KaSztella chart. With the help of this chart every reader may identify his or her King, Queen, Courier, Lady-in-Waiting, Captain, Prelate, Old King, Clown, Ghost, Sorcerer, and the Realm governed by these figures. It will also be possible to define which field of life these characters dominate, what kind of relationship they maintain with each other, in what way the Kingdom can develop, what dark secrets the Castle holds, and so on. We give all necessary help for the interpretation of the chart.

Getting to know our inner characters helps the improvement of self-knowledge and self-acceptance. It is often enough to take a look at our figures, try to make friends with them, and we will bit by bit recognise them in our thoughts, emotions and actions. With the help of the greatly expressive descriptions and pictures we might be able to understand our inner contradictions as well. At the same time, it is not only our consciousness that might develop rapidly, but also our relationships, because through the figures we might understand the powers that drive other people, and the factors that complicate our human relationships.

About the book

This book is not about astrology by definition, it is about self-knowledge. Considering its genre, it is somewhere between psychology and astrology (with some esoteric influence). It could be labelled with expressions like “role personalities” or “archetypes”. This personality-analysing method is suitable for all types of readers, those interested in astrology and laymen too, because it evokes universal archetypes which are also well known from myths, tales and psychology.

Astrology has a great advantage as opposed to psychology: while a psychologist has to analyse his or her patients for months to get a picture of the personality, an astrologer has a complete map of the patient's traits – the birth chart. The map has to be deciphered according to ancient and modern rules of astrology. Until now this science has been quite closed, because astrologers tended to bastion themselves with enigmatic and complicated terms and symbols. KaSztella throws out light in the darkness, and makes the personality-map easier to understand for the curious and susceptible readers.

With this aim in mind, we tended to reduce the amount of astrology in the book to the minimum; instead of abstract astrological notions, we included ancient archetypal motifs, like the King (Sun), the Queen (Moon), the Courier (Mercury), the Captain (Mars), the Prelate (Jupiter) etc. By presenting all figures in all 12 zodiac signs, we help the readers understand the analogical nature of the world. With the descriptions and pictures we would like to act on the readers' own intuition and self-knowledge. Nevertheless, if the readers would like to know more about the astrological theory, they will find a kind of astrological course-book on our homepage.

The book is 296 pages long, a B5 standard offset size. It has a hard cover with a matte foil, and sewn binding. It contains 90 colourful pages with illustrations.

Since our starting point is the birth chart, we need a kind of diagram, but instead of the traditional astrological birth chart, we use our own KaSztella chart, with symbolic chess figures in the parts of the Castle (see next page). This individual chart can be obtained from our homepage. In our book we also help readers to convert a traditional astrological chart to a KaSztella chart, so that even those can enjoy our method who – for some reason – cannot get access to our software. Also, at the end of the book there are charts and tables showing the positions of the figures (geocentric ephemeris of the planets) in an interval of approximately 100 years.

This is the scheme of the chart our software will produce. The book also provides tables to identify the symbols for the zodiac signs, the figures (King, Queen, Courier etc.) and the other parts of this chart (e.g. the rooms of the Castle - astrological houses; the relationships - aspects of planets). From these individual elements, everyone can build up their inner realm, their unique castle, their cast of role personalities, and the distinctive drama they create.

Apart from the 133 colourful images, many black and white illustrations make the book more appealing and visual. **The illustrations were created by Kira Santa and Peter Balla.** The visual representations and the written descriptions together make up the complete characters, so the graphics are an indispensable part of the method.
